DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

I. Claims 1-32, drawn to a method of inducing a reduced immune response comprising administering fibroblasts.

II. Claim 33, drawn to a composition comprising a fibroblast.

3. The inventions listed do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

U.S. Patent No. 5,736,396 (IDS) teaches a composition (human bone marrow) comprising human fibroblasts (see particularly column 4, lines 41-45).

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have single general inventive concept and lack unity of invention.

4. Accordingly, Groups I and II are not so linked as to form a single general inventive concept and restriction is proper.
5. Should Applicant elect Group I, Applicant is further required under 35 U.S.C. § 121 to elect a **specific** donor tissue type, such as one listed in Claim 15 or Claim 24, a **specific** fibroblast type, either autologous or allogeneic, and list all Claims readable thereon including those subsequently added. Currently all claims are generic.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (703) 308-9805. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:00 pm. A message may be left on the examiner's voice mail service.
